

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more market-oriented. A third change is that the public sector has become more customer-oriented.

The changes in the way that the public sector is organized have led to a number of challenges for the public sector. One challenge is that the public sector has become more complex. Another challenge is that the public sector has become more competitive. A third challenge is that the public sector has become more demanding.

The challenges that the public sector faces are a result of the changes in the way that the public sector is organized. The public sector must find ways to meet these challenges in order to continue to provide the services that it is expected to provide.

One way that the public sector can meet these challenges is by increasing the number of people employed in the public sector. Another way is by increasing the efficiency of the public sector. A third way is by increasing the quality of the services that the public sector provides.

The public sector has a long way to go in order to meet the challenges that it faces. The public sector must continue to find ways to increase the number of people employed in the public sector, to increase the efficiency of the public sector, and to increase the quality of the services that the public sector provides.

The public sector is a vital part of the economy and the welfare state. The public sector must continue to find ways to meet the challenges that it faces in order to continue to provide the services that it is expected to provide.
