

## DATA MANAGEMENT PLAN

**Legal and ethical considerations.** The bulk of data collection comprises of observations of a public setting and intensive interviews with public officials. ConfoaT TJ19.325 0 TD.0004 Tw{ and organizations. )-20.4(All inte coursenofgthespro

Type	Description	Forms
Archival data	Over 250 observations (scanned and hard copy) of sexual assault related court hearings from student monitors between September 2010 and May 2012.	PDF; hard copy
Interviews	Intensive interviews (audio files and transcriptions) from PHASE 1 and PHASE 2 of the project timeline. Approximately 60 intensive interviews averaging 90 minutes per interview; approximately 90 follow-up, case-specific interviews with trial participants averaging 40-60 minutes per interview.	MP3; Word documents (.docx)
Consent forms	Informed consent forms signed and dated by interviewer and interviewee (60 + 90 = approximately 150 in total).	PDF; hard copy
Field notes/observations	Hard copy and typed field notes during PHASE 2 from two investigators and one research assistants' observations of approximately 35 sexual assault trials between January and December 2013.	Word documents (.docx); hard copy
Analyses	All data is uploaded into Atlas.TI software for analysis. New data generated includes coding charts and guides, categories, themes, and comparison data analyzed.	.txt, generated in Atlas.TI

Digital interview recordings are downloaded in MP3 format and identified according to file-naming conventions established (e.g., interviewee number, date and type of interview). Interviewee pseudonyms are randomly assigned according to hurricane name schedules designated by The National Weather
