

with the transition to the revised tools.

In 2022, APTA made the decision to invest in the psychometric review of the PT and PTA CPIs to align the content and scoring model to best practices in 2023. That work was completed in partnership with Human Resources Research Organization (HumRRO) in November 2022. APTA is currently working with its new technology vendor, Competency.AI, to have these tools available for use in an electronic, mobile friendly platform.

APTA is aware that academic programs and clinical sites need to be able to review the revised proficiency domains, behaviorally anchored rating scales, and rater instructions for the revised tools ahead of their launch on the technology platform. This information is being provided to assist users prepare for the transition. **Note:** These sample paper versions of the revised tools do not include the fields for critical incident, narrative comments, and other features.

Content in the PT CPI tool is copyrighted to APTA. Academic and clinical institutions may review and share this information within their own programs/sites as necessary; however, the contents of this tool may not be reproduced or redistributed beyond the scope of a review without prior written approval from APTA.
