

Marquette University

Conflict of Financial Interest Certification

Approved by Academic Senate: November 29, 1995

Approved by Academic Vice President, January 1, 1996

Updated January 28, 2010 (replaced Vice President for Academic Affairs with Provost)

I. University Policy

To avoid any possible conflict of interest in the conduct of grant or contract activities, the following safeguards are established, as mandated by federal law¹, to prevent employees or consultants from using their positions for purposes that are, or give the appearance of being, motivated by a desire for private gain for themselves or others, such as those with whom they have family, business or other ties. Adopting this policy not only complies with federal requirements, but also helps insure that high standards of scientific integrity govern the conduct of sponsored projects, thereby bolstering public understanding and trust of science. Accordingly, this policy is effective immediately.

II. Implementation

At the time a grant or contract is submitted to an extramural sponsor and registered in the Office of Research and Sponsored Programs (ORSP), whether to a governmental or nongovernmental sponsor, the Principal Investigator or Project Director must file a Conflict of Interest Certification Form with ORSP. The following provisions apply.

1. Each Principal Investigator or Project Director² must disclose to the Director of the Office of Research and Sponsored Programs all significant financial interest³ of the investigator, including those of the investigator's spouse and dependent children:

- a. that would reasonably appear to be affected by the research or education activities proposed for funding, or
- b. in entities whose financial interests would reasonably appear to be affected by such activities.

2. While the initial disclosure must be provided at the time the proposal is submitted, each disclosure must be updated annually or sooner if new reportable significant financial interests are obtained.

3. If an actual or potential conflict of interest exists, the Director of Research and Sponsored Programs will determine what conditions or restrictions, if any, should be imposed to manage, reduce, or eliminate such conflicts⁴. These conditions or restrictions might include, but are not limited to, the following.

- a. Public disclosure of significant financial interests
- b. Monitoring of research by independent reviewers
- c. Modification of the research plan

¹ PHS: 60 FR 35810-35819; NSF: 60 FR35820-35823, both issued in the Federal Register (FR) on July 11, 1995.

² The terms "Principal Investigator" and "Project Director" include other key project personnel who have independent responsibility for accomplishing project objectives.

³ "Significant financial interest" means anything of monetary value, including, but not limited to, salary or other payments for services (e.g., consulting fees or honoraria); equity interests (e.g., stocks, stock options or other ownership interests); and intellectual property rights (e.g., patents, copyrights and royalties from such rights). The term does not include (1) salary, royalties or other remuneration from Marquette University; (2) income from seminars, lectures, or teaching engagements sponsored by public or nonprofit entities; (3) income from service on advisory committees or review panels for public or nonprofit entities; (4) an equity interest that, when aggregated for the investigator and the investigator's spouse and dependent children, meets both of the following tests: does not exceed \$10,000 in value as determined through reference to public prices or other reasonable measures of fair market value, and does not represent more than a 5% ownership interest in a single entity; or (5) salary, royalties, or other payments that, when aggregated for the investigator and the investigator's spouse and dependent children, are not expected to exceed \$10,000 during the next twelve month period.

⁴ An actual or potential conflict exists when the Director of Research and
